

Helping Business Help Themselves

Glorybound Publishing Options for Business is a unique program in which we develop publications resulting in templates for business, then return the template on a CD back to the business or individual for their extended use and option to edit and print using their own equipment.

Glorybound Publishing is located in Las Vegas, Nevada, however works with authors, artists and musicians through the world (in a variety of languages) via the world-wide web. Beginning in 2005, by Sheri Hauser, the company has grown into four divisions: GBK, Glorybound Lasertrain, Publishing Options for Business and Glorybound Books. GBK refers to the children's books, Lasertain is the digital software publishing patterns and print sets, and Glorybound Books are the adult spiritual training books. All of our books are registered with Bowkers ISBN and United States Copyright Office.

Cristotech is owned by Reverend Dr. Samuel Olumoko residing in Nigeria. He is a Pastor and author of several books published by Glorybound Publishing. He brings extended training as a web Master to the web construction already in progress through Glorybound Options for Business Program.

\$620 TOTAL PACKAGE COST

Glorybound Basics

We offer 3 page web site with 20 pdf attachments, 4 photos built on GoDaddy Build-it-in-a-Night Web Site Option. To build this web site, the business must have a registered domain (can be ordered through us) and an account with GoDaddy Build-it-in-a-Night. The Web Site is built by Glorybound Publishing, then turned over to the individual (business) to manage. An account usually costs around \$60.00 (paid for the entire year) with a fee of \$5.00 per month payable to Go-Daddy.

Process of building the web site:

1. Develop a Logo
2. Develop a business brochure
3. Upload the information from the brochure onto the web site adding additional information and pictures.
4. The Web site can be operational almost immediately upon development of the brochure. There is no waiting.

Details on the 3 page web site with 20 pdf Web pages developed using Macro media Software with integration of Photoshop, Illustrator and PDF. Your Logo with (up to) four pictures per page (You provide the photos). They will be taken into Photoshop software and made to be Web-ready. We can use either photos, CD of photos, or real photos. This is a three page non-retail web site which does not contain a shopping basket. We can add up to 20 Pdf to this web site which essentially makes the site over 23 pages.
